Subject: Inquiry regarding Senior AI / Machine Learning Engineer - Core Intelligence at Google

Hi [Hiring Manager / Recruiter Name],

I noticed that Google is expanding its Core Intelligence team for the **Senior AI / Machine Learning Engineer - Core Intelligence** position.

As a Senior AI Engineer (Stanford MS CS) specializing in production LLMs, RAG retrieval, and model quantization (PyTorch/ChromaDB), I have recently applied for the role. I'd love to connect and share a brief summary of how my experience deploying high-throughput agent systems aligns with your team's current roadmap.

Best regards,

Dr. Alex Morgan
