

Tailored Portfolio Projects Selection

Selected Projects for Google (Senior AI / Machine Learning Engineer - Core Intelligence)

1. Baki - Intelligent Agentic Workspace Assistant

- *Tech*: Python, PyTorch, FastAPI, ChromaDB, Docker
- *Relevance*: Direct match for Agentic LLM workflow requirements.

2. EdgeQuant - High-Speed LLM Quantization Toolkit

- *Tech*: Python, C++, PyTorch, CUDA, TensorRT, ONNX
- *Relevance*: Direct match for model optimization and INT8/4-bit quantization.

3. Adaptive Blended Assessment Engine

- *Tech*: Python, PyTorch, Scikit-Learn (Random Forest), FastAPI
- *Relevance*: Demonstrates applied AI modeling and academic publication (ACL 2022).
