

LINKEDIN RECRUITER / TEAM OUTREACH MESSAGE

Hi AI & NLP Research Group / Academic Lab Team,

I noticed that AI & NLP Research Group / Academic Lab is accepting applications for the **Research Internship / Visiting Student Researcher -- Artificial Intelligence & Natural Language Processing** program.

As an AI & Cybersecurity Master's student with hands-on experience in Python, Scikit-learn, EDA, data cleaning, and ML model training (published on GitHub), I have submitted my application. I would love to connect and share my enthusiasm for building and documenting end-to-end ML projects!

Best regards,

Benouali Abdelkader Yahia Zakaria
