

BENOUALI ABDELKADER YAHIA ZAKARIA

AI & Automation Intern (Remote) | Master's Student in Artificial Intelligence & Cybersecurity

Beni Saf, Aïn Témouchent, Algeria | +213 781 306 713 | abdelkaderbenouali301@gmail.com | [LinkedIn](#) | [GitHub](#) | [Behance](#)

SUMMARY

Tech-driven Master's student in Artificial Intelligence & Cybersecurity at University Ain Temouchent Belhadj Bouchaib, with a Bachelor's in Computer Science (Ranked Top 3 in cohort). Hands-on experience developing Python-based AI workflows, automated data pipelines, machine learning models (Random Forest, NLP), and responsive UI dashboards. Proven ability to thrive in international remote environments through Harvard-affiliated leadership training (Aspire Institute) and Erasmus+ digital exchange. Eager to leverage AI-assisted coding tools, process automation, and logical problem-solving to build high-impact internal tools at Bamboo Works.

EDUCATION

Master's Degree in Artificial Intelligence & Cybersecurity

University Ain Temouchent Belhadj Bouchaib --- Aïn Témouchent, Algeria | *September 2025 -- July 2027 (In Progress)*

- **Specialization:** Artificial Intelligence, Machine Learning, Deep Learning, Cybersecurity Fundamentals, Data Ethics, Information Systems.

Bachelor's Degree in Computer Science

University Ain Temouchent Belhadj Bouchaib --- Aïn Témouchent, Algeria | *September 2022 -- June 2025*

- **Academic Distinction:** Ranked **Top 3 (3rd Place)** out of the entire cohort across the first 4 semesters (L1 & L2).
- **Core Competencies:** C Programming Language, Data Structures, Algorithms, Computer Networking, Systems Logic, Teamwork.

TECHNICAL PROJECTS & AI AUTOMATIONS

Adaptive Blended Assessment System --- Machine Learning Engine

Python, Machine Learning, Data Processing

- Architected an automated student evaluation model utilizing Random Forest classification to process performance metrics and generate personalized, data-driven feedback.
- Engineered structured data input/output pipelines to replace manual assessment workflows with 100% reproducible automated scoring.

Eco Sentinel --- Automated AI & Environmental Data Pipeline

Python, AI Workflows, Data Analytics

- Developed an intelligent data ingestion tool that automates environmental metric processing, analysis, and ecological risk reporting.
- Designed automated monitoring logic to transform raw environmental datasets into structured, actionable analytical summaries.

Baki --- Conversational AI Workflow Assistant Prototype

Python, Natural Language Processing, Automation

- Built a context-aware conversational prototype leveraging Natural Language Processing fundamentals for automated user query resolution.
- Implemented conditional response workflows and structured dialog logic to streamline automated digital communication.

Technova Shop & Internal UI/UX Dashboard Systems

Figma, HTML5, CSS, JavaScript, Prototyping

- Created complete UI/UX design systems, user flows, and responsive front-end dashboard prototypes for e-commerce and internal tools.
- Built interactive glassmorphism UI components and intuitive navigation layouts emphasizing user efficiency and clarity.

LEADERSHIP & GLOBAL EXPERIENCE

Participant --- Aspire Leaders Program

Aspire Institute (Harvard-affiliated) --- *Remote Global* | July 2026 -- Present

- Selected for Cohort 3 of a competitive international leadership program for high-potential global leaders.
- Engaged in masterclasses led by Harvard educators (including Michael Horn) on digital innovation, career strategy, and problem-solving.
- Collaborated in cross-cultural remote teams to solve real-world operational and technical case studies.

Participant --- Erasmus+ Virtual Exchange Program

VIRTUALLYEDU --- *Remote International* | July 2026 -- Present

- Participating in an international Erasmus+-funded program focused on digital skills, cybersecurity, and virtual teamwork.
- Executing collaborative digital projects, online technical coursework, and cross-border problem-solving assignments.

Social Media Manager & Community Coordinator

Ben Issa Attar High School --- *Aïn Témouchent, Algeria* | September 2022 -- Present

- Automated announcement publishing and inquiry management for 4 years, increasing digital engagement and operational reach.
- Optimized parent and student communication workflows through scheduled updates and structured online moderation.

TECHNICAL SKILLS & LANGUAGES

- **AI & Automation:** Artificial Intelligence, Natural Language Processing (NLP), Machine Learning (Random Forest, Deep Learning), Generative AI, AI-Assisted Tools, Workflow Automation, Process Automation.
- **Programming & Web:** Python, C Programming Language, HTML5, CSS, JavaScript, Front-End Development, Git/GitHub.
- **IT Support & Systems:** IT Support, Systems Administration (Windows, Linux), Computer Maintenance, Network Troubleshooting (TCP/IP).
- **Design & Productivity:** Figma, UI/UX Design, Wireframing, Prototyping, User Flow Design, Microsoft 365 (Excel, PowerPoint, Word).
- **Languages:** Arabic (Native), English (Fluent / Professional Working Proficiency), French (Intermediate).
