

COVER LETTER

Company: Bamboo Works

Dear Hiring Team at Bamboo Works,

I am writing to express my strong enthusiasm for the **AI & Automation Intern (Remote)** position at Bamboo Works. As a Master's student in Artificial Intelligence & Cybersecurity at University Ain Temouchent Belhadj Bouchaib (and a Top 3 CS Bachelor's graduate), I am deeply excited about Bamboo Works's mission to build high-performing remote teams and leverage AI to optimize business operations.

My technical background is directly rooted in practical AI development and workflow automation. In my project **Adaptive Blended Assessment System**, I engineered automated machine learning pipelines using Random Forest algorithms to parse performance data and generate structured feedback. In **Eco Sentinel**, I built automated Python data ingestion pipelines, and in **Baki**, I created conversational AI workflows using NLP principles. Additionally, my hands-on UI/UX prototyping experience with Figma and JavaScript equips me to design clear, intuitive internal dashboards and tools for leadership and operational teams. Furthermore, my participation in international remote initiatives---including the Harvard-affiliated **Aspire Leaders Program** and the **Erasmus+ Virtual Exchange**---has sharpened my ability to collaborate seamlessly in cross-cultural digital environments, solve complex problems independently, and adapt rapidly to new technologies.

I would welcome the opportunity to contribute my enthusiasm for AI-assisted development, automation tools, and logical problem solving to Bamboo Works. Thank you for your time and consideration.

Sincerely,

Benouali Abdelkader Yahia Zakaria
