

EXPECTED INTERVIEW QUESTIONS & STAR ANSWERS

Q1 (Technical): How have you used Python to automate manual data processing workflows?

- **Situation:** Manual evaluation of student assessment data was time-consuming and prone to inconsistency.
- **Task:** Build an automated classification and feedback generation pipeline.
- **Action:** Developed the **Adaptive Blended Assessment System** using Python and Random Forest ML algorithms to process inputs and auto-generate reports.
- **Result:** Reduced evaluation processing time to seconds while providing 100% reproducible results.

Q2 (Behavioral): Describe your experience collaborating in remote, international teams.

STAR Answer:

- **Situation:** Participating in the Aspire Leaders Program (Harvard-affiliated).
- **Task:** Collaborate with peers across multiple timezones on complex leadership and technical case studies.
- **Action:** Utilized digital collaboration platforms, clear asynchronous communication, and structured task division.
- **Result:** Successfully delivered project presentations and received positive team evaluations.
