

MACHINE LEARNING INTERNSHIP STRATEGY NOTES

KEY STRENGTHS TO HIGHLIGHT

2. Targeted End-to-End Projects:

- **Adaptive Blended Assessment System:** Random Forest ML model & evaluation metrics.
- **Eco Sentinel:** Pandas/Matplotlib EDA and data cleaning pipeline.
- **NeuraSight:** Neural/AI data science research, Jupyter analysis, and web dashboard.

3. **Open Source & International Competitions:** Active publishing of GitHub repositories (`github.com/benoualiabdelkader`) and participation in UNESCO Youth Hackathon 2026 (EchoBreaker).

PROGRAM ALIGNMENT POINTS

- Strong self-pacing and independent learning ability.
- Passion for project-based learning and clear empirical model evaluation.
