

STATEMENT OF MOTIVATION & CAREER PURPOSE

Opportunity: Research Internship / Visiting Student Researcher -- NLP & Large Language Models

Why King's College London (KCL) -- Department of Informatics?

King's College London (KCL) -- Department of Informatics's research and development focus aligns seamlessly with my dedication to learning by building. I am passionate about applying core ML fundamentals---from data cleaning and feature engineering to model training and evaluation---on practical datasets.

Technical Alignment & Personal Drive

My background in Computer Science and current Master's studies in AI & Cybersecurity have given me a solid grounding in Python, Jupyter Notebooks, NumPy, Pandas, Scikit-learn, and data visualization. Projects like Adaptive Blended Assessment System, Eco Sentinel, and NeuraSight reflect my commitment to rigorous data analysis and open-source publication.

Future Outlook

During this fellowship at King's College London (KCL) -- Department of Informatics, I aim to complete robust end-to-end ML tasks, document performance results clearly, and publish high-quality open-source projects on GitHub and LinkedIn.
