

LINKEDIN RECRUITER / TEAM OUTREACH MESSAGE

Hi King's College London (KCL) -- Department of Informatics Team,

I noticed that King's College London (KCL) -- Department of Informatics is accepting applications for the **Research Internship / Visiting Student Researcher -- NLP & Large Language Models** program.

As an AI & Cybersecurity Master's student with hands-on experience in Python, Scikit-learn, EDA, data cleaning, and ML model training (published on GitHub), I have submitted my application. I would love to connect and share my enthusiasm for building and documenting end-to-end ML projects!

Best regards,

Benouali Abdelkader Yahia Zakaria
