

BENOUALI ABDELKADER YAHIA ZAKARIA

AI & Digital Transformation Intern | Master's Student in Artificial Intelligence & Cybersecurity

Aïn Témouchent, Algeria (Remote Available) | +213 781 306 713 | abdelkaderbenouali301@gmail.com | LinkedIn | GitHub | Behance

SUMMARY

Tech-driven Master's student in AI & Cybersecurity at University Ain Temouchent Belhadj Bouchaib (Bachelor's in Computer Science, Ranked Top 3 in cohort). Hands-on experience engineering AI-powered Natural Language Processing (NLP) systems, content recommendation engines, automated data pipelines, and intelligent news platforms (NewsBot, Wanderlust AI). Proven track record in API backend integration, machine learning, and process automation. Eager to apply AI, NLP, recommendation algorithms, and data science to real-world media challenges and digital transformation at Qatar Media Corporation (QMC).

EDUCATION

Master's Degree in Artificial Intelligence & Cybersecurity — University Ain Temouchent Belhadj Bouchaib, Aïn Témouchent, Algeria | September 2025 – July 2027 (In Progress)

- Specialization: Artificial Intelligence, Machine Learning, Deep Learning, Natural Language Processing, Cybersecurity, Data Ethics, Information Systems.

Bachelor's Degree in Computer Science — University Ain Temouchent Belhadj Bouchaib, Aïn Témouchent, Algeria | September 2022 – June 2025

- Academic Distinction: Ranked Top 3 (3rd Place) out of cohort across L1 & L2.

PROJECTS

NewsBot – AI-Powered News System & Content Recommender | GitHub Repo | Node.js, Express, Google Gemini 1.5 Flash API, NLP, REST API

- Designed and deployed an AI news chatbot using Google Gemini 1.5 Flash API and Express.js, delivering real-time news summarization, automated fact-checking, and category-based NLP analysis across 8 media domains.
- Built a content recommendation and topic-filtering engine powered by custom LLM prompt architectures, exposed via a POST /chat REST API endpoint with logging and .env security.

Wanderlust AI – AI Recommendation Engine & Multi-API Media Platform | GitHub Repo | Google Gemini API, YouTube Data API, JavaScript, Tailwind CSS

- Engineered an AI content recommendation engine integrating Google Gemini API and YouTube Data API to deliver personalized media suggestions, topic-based content filtering, and multi-source video/photo aggregation.

Adaptive Blended Assessment System – AI Data Pipeline & Analytics Engine | GitHub Repo | Python, WriteLens V2 AI Engine, Groq LLM API, Node.js, React, TypeScript

- Architected a 3-tier AI analytics engine (WriteLens V2) processing unstructured text submissions into diagnostic profiles and cohort intelligence summaries, deployed across 88 production runs on Render cloud with privacy tokenization.

EcoSentinel AI – Environmental Monitoring & Bilingual ML Dashboard | GitHub Repo | Python, Scikit-Learn (SVM RBF Kernel), Pandas, NumPy, Streamlit

- Engineered an aquatic pollution detection system using a Scikit-Learn SVM (RBF kernel) classifier on environmental sensor data (turbidity, dissolved oxygen), deployed via a Streamlit dashboard with bilingual Arabic/French interface support.

EXPERIENCE & VOLUNTEERING

Social Media Manager & Community Coordinator — Ben Issa Attar High School, Aïn Témouchent, Algeria | September 2022 – Present

- Automated announcement publishing, content scheduling, and community moderation workflows for 4 years, scaling digital reach and audience engagement.

Participant – Agentic Cinema: Google Cloud AI Hackathon — Devpost / Google Cloud, Remote Global | August – September 2026

- Building autonomous AI agents using Gemini Enterprise Platform and Google Cloud Agent Builder for media & entertainment workflows.

Participant – UNESCO Youth Hackathon — UNESCO, Remote Global | 2026

- Developed digital solutions for global youth challenges as part of UNESCO's international hackathon.

Participant – Aspire Leaders Program — Aspire Institute (Harvard-affiliated), Remote Global | July 2026 – Present

- Participating in Harvard educator-led masterclasses on digital innovation, career strategy, and cross-cultural problem-solving.

Participant – Erasmus+ Virtual Exchange Program — VIRTUALLYEDU, Remote International | July 2026 – Present

- Participating in an international Erasmus+-funded program focused on digital skills, cybersecurity, and virtual project collaboration.

Acquaint Volunteer — Acquaint (501(c)(3) Nonprofit), Remote Global | July 2026 – Present

- Engaging in structured international cross-cultural dialogue to foster active listening, empathy, and global English communication.

SKILLS

AI & Data Science: Natural Language Processing (NLP), Machine Learning, Recommendation Algorithms, Large Language Models (LLMs, Gemini API, Groq), Scikit-Learn (Random Forest, SVM), Data Analysis & Processing, Data Ethics

Software & Web Development: Python, JavaScript (Node.js, Express.js), C, HTML5, CSS3, REST API Architecture, Git, GitHub, Streamlit, React, TypeScript

Systems & Cybersecurity: Systems Administration (Windows, Linux), Cybersecurity Fundamentals, IT Infrastructure, Information Systems

Languages: Arabic (Native), English (B2 Level – Intermediate / Working Proficiency), French (B1 Level – Working Proficiency)
