

COVER LETTER

Company: SPARK AI Research

Dear Hiring Team at SPARK AI Research,

I am writing to express my strong enthusiasm for the **SPARK AI Research Fellowship (Remote)** opportunity at SPARK AI Research. As a Master's student in Artificial Intelligence & Cybersecurity at University Ain Temouchent Belhadj Bouchaib (and a Top 3 CS Bachelor's graduate), I am eager to apply my skills in Python, Pandas, NumPy, Scikit-learn, and Machine Learning to build end-to-end project initiatives during this internship.

Throughout my academic journey, I have focused heavily on practical Machine Learning workflows. In my project **Adaptive Blended Assessment System**, I designed an end-to-end Machine Learning pipeline using Random Forest classification, handling data cleaning, feature engineering, Exploratory Data Analysis (EDA), and algorithm performance benchmarking. In **Eco Sentinel**, I built automated data processing scripts utilizing Pandas and Matplotlib for data visualization. In **NeuraSight**, I executed a complete research pipeline from Jupyter Notebook data analysis and ML model evaluation to a web visualization dashboard and a formal academic LaTeX report, published on GitHub.

Furthermore, I actively publish my technical projects on GitHub and LinkedIn, aligning perfectly with SPARK AI Research's requirements. My experience in international remote programs---such as the Harvard-affiliated **Aspire Leaders Program**, **UNESCO Youth Hackathon 2026 (EchoBreaker)**, and **Erasmus+ Virtual Exchange**---has equipped me with strong self-pacing, logical problem-solving, and independent learning capabilities.

I am excited about the opportunity to build, evaluate, and share end-to-end Machine Learning projects with SPARK AI Research. Thank you for your time and consideration.

Sincerely,

Benouali Abdelkader Yahia Zakaria
